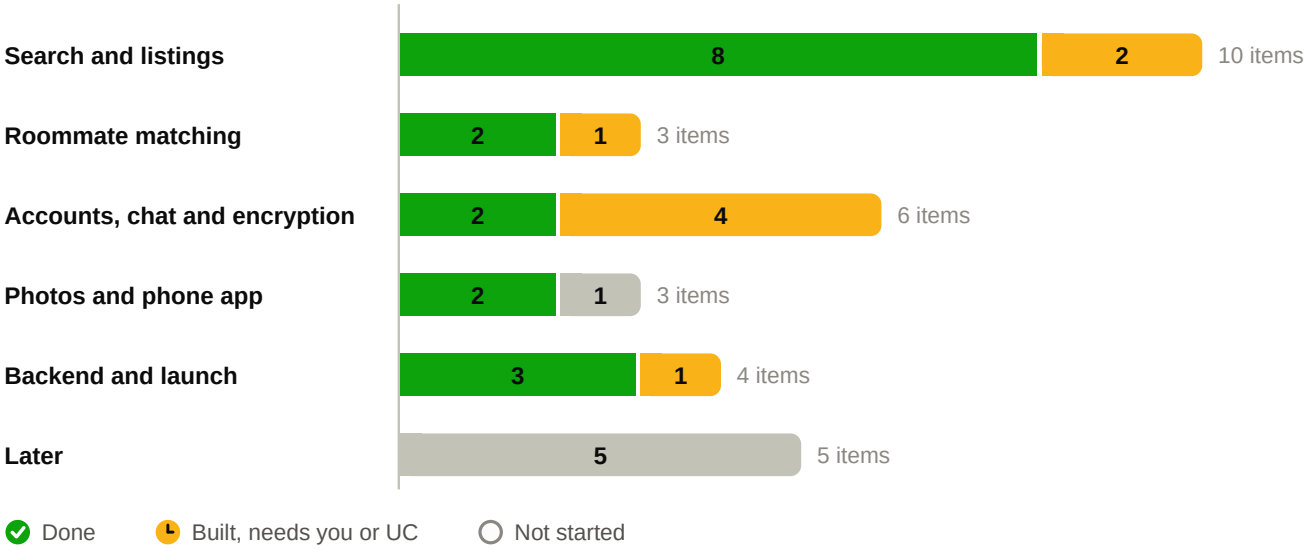
Roost: what we discussed, what's done, what's left

Status as of October 21, 2026. Sources: the advisor meeting 1 notes, the questions prepared for today's meeting, and this session's requests (map fix, Supabase backend, chat encryption).

Done	Built, needs you or UC	Not started
17 of 31 items	**8** of 31 items	**6** of 31 items

Where each topic stands

Items per topic, split by status. Every item is listed in the table that follows.



What this means

- **The first-priority work from meeting 1 is built:** distance search and map, the listing form with fee splitting, roommate ranking, and photo compression. The remaining gaps are mostly not features.
- **One 15-minute dashboard task of yours unlocks the most:** the email template, custom SMTP and URL settings in Supabase. Until then nobody can receive a sign-in code, so the chat can't be test-run and the live site can't switch over.
- **Most amber items need an answer, not code:** real transit data, UC's chat-retention rule, the chat privacy model, the roommate wording, and an LLM spending cap.
- **Nothing live broke.** The old demo (code 123456) is still on the live site for today's meeting; the Supabase version is on a preview link.

Every item: discussed vs. done vs. still to do

"Came from" shows where the item was raised: advisor meeting 1, the prep for today's meeting, or your requests this session.

TOPIC	CAME FROM	STATUS	WHAT WAS DONE	STILL TO DO
SEARCH AND LISTINGS				8 done, 2 need you or UC, 0 not started
Distance from UC instead of neighborhoods	Meeting 1	✅ **Done**	Filter chips for 1, 3, 5, 10, 20 miles or any, computed from each address.	Open question: straight-line miles or driving time.
Zillow-style map view	Meeting 1	✅ **Done**	List / Map toggle on Browse with clustered pins and popup cards.	Try the phone map on a real device.
Fix the Browse map UI	This session	✅ **Done**	Price pins now fit their text (they were clipped), clusters, popup card, softer basemap.	Nothing.
Address lookup sets the distance	Meeting 1	✅ **Done**	Free OpenStreetMap lookup, no Google key needed.	Rate-limit and cache it before heavy use.
Nearest UC shuttle and Metro stop	Meeting 1	🕒 **Needs you or UC**	Shown on every listing, but using sample stops.	Real shuttle (TripShot) and Metro (GTFS) data from UC.
Listing form: rent, dates, utilities, furnished, room vs whole, lease type	Meeting 1	✅ **Done**	All fields, checked in the app and again in the database.	Nothing.
Sublet fee after landlord consent, with split slider	Meeting 1	✅ **Done**	Fee appears after consent; 0 to 100% slider with live dollar amounts.	Nothing.
Amenity tags as icons	Meeting 1	✅ **Done**	Icons with hover and tap labels instead of words.	Nothing.
Property group and Google review rating	Meeting 1	🕒 **Needs you or UC**	Built and labeled as Google reviews, with sample data.	Pick a real review source (Google's data has its own terms).
Open to faculty, staff and grad students	Meeting 1	✅ **Done**	Both @uc.edu and @mail.uc.edu can join.	Nothing.
ROOMMATE MATCHING				2 done, 1 need you or UC, 0 not started
Roommate checkboxes and rating scales, users rate themselves	Meeting 1	✅ **Done**	6 rating scales plus smoke-free and cat/dog checkboxes, saved to each profile.	Nothing.
Rank by fit, with a Show all toggle	Meeting 1	✅ **Done**	Best fit first; poor fits stay hidden until Show all.	Nothing.
Confirm categories and wording; fair-housing check	Today's prep	🕒 **Needs you or UC**	Draft categories are in the app.	Advisor to confirm the wording and whether hosts also state preferences.
ACCOUNTS, CHAT AND ENCRYPTION				2 done, 4 need you or UC, 0 not started
Sign-in without SSO (emailed code, UC emails only)	Meeting 1	🕒 **Needs you or UC**	Built. The database rejects non-UC emails before any email is sent.	You: email template, custom SMTP and URL settings in the Supabase dashboard (about 15 minutes).
Real-time chat, contact hidden until shared	This session	🕒 **Needs you or UC**	Built on Supabase Realtime; only the two people in a chat can read it.	A signed-in test run (waits on the sign-in setup above).
Chats kept for 30 days	Meeting 1	✅ **Done**	Notice in the chat screen plus a nightly deletion job.	Nothing.

TOPIC	CAME FROM	STATUS	WHAT WAS DONE	STILL TO DO
Are Supabase chats end-to-end encrypted?	This session	**Done**	Researched: no. They use HTTPS, AES-256 at rest and row-level access rules.	Nothing.
Choose the chat privacy model	Today's prep	**Needs you or UC**	Recommendation written up: encryption in transit and at rest, 30-day retention.	Advisor decision. End-to-end would block staff review and LLM suggestions.
UC rule for chat retention and student data	Today's prep	**Needs you or UC**	Deletion runs at 30 days today.	Ask UC IT security or General Counsel.
PHOTOS AND PHONE APP				2 done, 0 need you or UC, 1 not started
Auto-compress photos and make thumbnails	Meeting 1	**Done**	Shrunk in the browser (1600 px and 480 px thumbnail), stored in Supabase Storage.	Delete stored photos when a listing is deleted.
Phone app (Expo Go)	Meeting 1	**Done**	Same features, running on local demo data.	Nothing.
Phone app on the shared backend, with photo upload	This session	**Not started**	Not started.	Reuse the Supabase data layer; keep the session in AsyncStorage; add photo upload.
BACKEND AND LAUNCH				3 done, 1 need you or UC, 0 not started
Supabase backend with security rules	This session	**Done**	6 tables and a photo bucket, security rules on every table, 26 scripted checks passed.	Turn those checks into a repeatable test.
Hosted for testing	Meeting 1	**Done**	Live demo on Vercel; the new version runs on a preview link.	Nothing.
Switch the live site to the Supabase version	This session	**Needs you or UC**	Preview works. The old demo (code 123456) stays up so nothing breaks today.	After sign-in setup: you say go, then merge and promote.
Weekly checklist	Meeting 1	**Done**	docs/CHECKLIST.md, updated today.	Keep updating each week.
LATER				0 done, 0 need you or UC, 5 not started
Low-cost LLM message suggestions	Meeting 1	**Not started**	Not started.	Decide what text may be sent and a monthly cap, then add a server route with a spending limit.
Student test plan: announcement, tasks, feedback form, analytics	Today's prep	**Not started**	Not started.	Pick a date, testers and tasks; build the form and analytics.
Launch hardening	This session	**Not started**	Field checks and a 20-listing cap per student are already in the database.	Bot protection, posting and message limits, report review screen, privacy policy and terms, accessibility pass, error monitoring, Supabase Pro plan.
Landlord consent proof	Today's prep	**Not started**	Checkbox is required (enforced in the database).	Decide whether a checkbox is enough for now or a lease upload is needed.
UC single sign-on	Meeting 1	**Not started**	Parked on purpose.	Last; needs UC IT approval.

What needs to happen next

#	WHO	NEXT STEP, IN ORDER
1	**You**	Supabase dashboard (about 15 minutes): put the code in the Magic Link email template, set up custom SMTP, set the site URLs. This unlocks real sign-in.
2	**You + Claude**	Sign in on the preview with your allowlisted email and run the flows: browse, post with a photo, message, share contact, save. Claude fixes whatever breaks.
3	**You, then Claude**	Say go: merge the supabase-backend branch and promote it to the live site.
4	**You + advisor (today)**	Decide the chat privacy model, who at UC sets retention, the LLM spending cap, who owns transit data, and the roommate categories.
5	**Advisor / UC**	Send shuttle (TripShot) and Metro stop data; Claude replaces the sample stops.
6	**Claude**	Move the phone app onto Supabase and add phone photo upload.
7	**You + Claude**	Plan the class test: date, testers, tasks, feedback form, analytics. Announce only after the first three steps.
8	**Claude, then you**	Hardening: bot protection, rate limits, report screen, privacy policy and terms, accessibility pass. You: move Supabase to the Pro plan before launch.
9	**Later**	LLM suggestions once the policy answer is in; UC single sign-on last.
